Corporate Headshot Days

For companies wanting a more personalized headshot experience, dedicated headshot days reserve a larger block of time for your team.

PERSONAL BRANDING PHOTOGRAPHY

More than a headshot. A collection of images that tells your business's story.

Your business deserves more than one professional portrait. Personal branding sessions are designed for entrepreneurs, business owners, and professionals who need a variety of images that showcase who they are, what they do, and what makes their business unique.

Whether you're a hairstylist, real estate professional, salon owner, boutique owner, attorney, or independent business owner, these sessions create a library of professional images you can use throughout your website, social media, marketing materials, and business profiles.

Your session may include:

- Professional portraits and approachable headshots
- Working or interacting with clients
- Behind-the-scenes images of your daily work
- Workspace, products, tools, and business details
- Lifestyle images that reflect your personality
- Natural, candid moments that help potential clients connect with you

For example, a hairstylist's session might include professional portraits, action images while styling a client's hair, workspace details, product photography, and images that capture the personality and atmosphere of the salon.

Each session is planned around your business, your brand, your ideal clients, and how you intend to use your images.

Personal Branding Collections

- A combination of professional portraits and branding images

FULL BRAND EXPERIENCE — $650

Planning & Location Options

Before your session, we'll discuss your business, brand personality, ideal clients, and the types of images that will best support your marketing goals.

Sessions take place at your business, or at a selected outdoor location. Additional locations or extensive travel may require an additional fee.

IMAGE DELIVERY & USAGE

All final images are professionally edited and delivered digitally.

Standard editing includes adjustments for exposure, color, lighting, white balance, and overall image consistency. Individual headshots and branding images also include standard skin smoothing and basic blemish removal as outlined in the selected service.

Images are intended for standard professional and business use, including:

- Company websites and employee directories
- LinkedIn and professional profiles
- Social media
- Business marketing and promotional materials
- Personal professional portfolios

Expanded commercial reproduction or specialized licensing, such as use in books, movies, or commercial publications, may require a separate licensing agreement and fee.

LET'S WORK TOGETHER

Whether you need coverage for an upcoming event, professional headshots for your team, or a collection of images that brings your business's personality to life, I'd love to help.
